

Pain with Prescriptions

Comments with Context

CareLoggr is built for palliative care.

Painless to Use

Record data with easy visual forms in our mobile app, web browser, SMS chat, or report your symptoms to Amazon Alexa.

Instant Analysis

Doctors receive real-time surveys, trend analysis, and actionable reporting. Create comprehensive and customizable dashboards to track multiple parameters.

Opioid Tracking

iDialogs keeps track of doses, medication adherence, provides alerts to potential overdose conditions.

HIPAA Compliant

Utilizing client-side rendering, data obfuscation, no protected information is ever transmitted to our Google Maps.

CareLoggr provides objective information that helps me decide if I need to change a patient's opioid dosage. This data has been hard to find in the palliative care world, but with CareLoggr, I can evaluate a story in a matter of seconds."
